

The Log Cabin

By: Drew, Dylán, and Diego

These are materials we used for the log cabin.

Green clay

Brown sugar

Blue fun foam

Doll house furniture

Brown fun foam

Cardboard

We added a pond because in the book, Attean and Matt fished in the pond for fish. Also, Attean made Matt a fishinghook. For the pond, we put green clay on it to give it lily pads. His cabin was made out of wood, so we used cardboard. Since his house had dirt as a floor, we used brown sugar. We also used something called fun foam to add a door and the pond. We used a bottom of a box for the roof.

Thank you Mr. Doyle for
all the support.
