How I Made My Log Cabin
By: Malory Lacey

First of all my dad and I read the description. Then, we gathered sticks to make the walls. While gathering sticks, we found a cedar tree and we used some of the branches for the roof. We started by notching the sticks and making them fit by taking the first one and cutting about one inch apart. Once we had everything put together, we took the cedar tree branches we cut off the tree and glued the branches on top of our cabin. Finally, we made the furniture, which was a puncheon table, a loft, and a bed. I had a lot of fun making my Log Cabin!!

Above is something that a student wrote about how she made her log cabin. If we follow similar steps we can have great log cabins.

First, what we need to do is do some research on log cabins. We can also find the description of the log cabin in the book "Sign of the Beaver". Then, we make a team and figure out what we want to do. The last step is we need to bring in our materials into class and start building our log cabins.

My Teams Plan

My team wanted to make a log cabin from the following materials:

- Cardboard
- Popsicle sticks
- Pebbles
- LPS/Barbie/Lego toys
- Colored paper
- Mission project stuff
- Frosting
- Pencils
- Mini fish
- Tooth picks
- String
- Sand
- Rubber bands
- Flour
- Wire
- Fake plants
- Playdo/clay

What We Ended Up Using

The following materials were the ones we actually ended up using:

-Trees

-Playdoh

-Barbie/Lego/Lsp toys

-Paint

-Pebbles

-Tissue box

-Pretzels

-Popsicle sticks

-Dirt

The Description of Our Log Cabin

My team was Alejandra, Gracie, and Laisha and together we made a log cabin. Our log cabin is a regular tissue box with tan paper glued to the sides and Playdo for the chinking. Then, we glued dirt from outside to the bottom for the floor. Next, we put all the furniture. Later on, we realized we wouldn't have enough room, so we decided to add the loft. Then, we added Matt's bed and Matt and a couch to the loft. That is my description of our cabin.

The End
