

# ☆OUR LOG CABIN☆

**My name is Nicoli and today I will show you Macey and I 's project. For our project, We used supplies we found around the classroom. We also got some help from Mr. Doyle. Some people stopped and talked to us and gave us some suggestions that were really helpful. I had a fun time making this bizarre project.**

*By: Nicoli Makila Danley*

First we made walls out of popsicle sticks. After that, we made one bed and two stools. Then we did the same with the roof, except the chimney and the insulation (leaves). For the chimney, Mr. Doyle gave us the bottom of a toothpaste box. I painted the inside green to match green leaves on corn and brown on the outside, so it looks like it's real. Once we finished that Macey painted the outside of the log cabin. While she was doing that I started to think of making a river. So Macey colored a river and colored it in. When she was done, Music (sorry if I spelled it wrong) and Tristan let me borrow some small rocks. I used the rocks to put around the river, like a frame. While I was doing that Macey made a small pathway for the doorway going outside. The next day I wasn't there and Macey painted the ground green.

Here are some pics 😜😜

The end

Thank you Mr. Doyle  
for letting us make a log
